

Volume 4, Issue 10, October 2013

By IJSER Editorial Board

IJSER is proud to announce the publication of the fourth volume for October 2013 of the International Journal of Science & Engineering Research. This Journal provides a glimpse into a few of the many high quality research activities conducted by the talented researchers around the world. The Journal is a compilation of outstanding papers from numerous disciplines submitted by students, researchers and scientists who have been involved in research, scholarly, and creative activities. The papers are through with an enhanced skill set, including better problem solutions, critical thinking, and team-working skills. Since many researchers who are highly qualified in their region, support of academic and research has a direct and positive impact on the upcoming researchers. We would like to express our sincere thanks to all those scientists for choosing IJSER from the first volume of the Journal since year 2010 and making it to 2013 now. We would like to especially thank the editorial members of the IJSER team for their constant support over past 3 years and also a welcome to the new members joining the team. Many thanks to the paper review committee for their constant support in timely reviewing the papers to the best of their expertise knowledge. The support from prominent regional businesses and organizations is greatly appreciated and essential for the advancement of research and journal wellbeing. There is a wide range of paper submission all the way from technology to social science titles like "*Economic aspects of Grasscutter Farming in Southwest Nigeria: Implications for Sustainable Adoption and Conservation*" by Adedapo Ayo Aiyeloja and Adekunle Anthony Ogunjinmi explaining in detail about Economic aspects of grasscutter farming and their implications for sustainable adoption and conservation were studied in Ondo, Osun and Oyo States, southwest Nigeria. Data were collected through questionnaire administration from 4 Local Government Areas in Ondo and Osun States while they were collected in 5 Local Government Areas in Oyo State where grasscutter farming has been adopted and extended to the deep technical titles like "*Process Automation versus Power System Automation*" by Anannya Mukherjee explaining about the Industrial Automation is one of the areas of engineering which has been undergoing

continuous and fast developments since its inception. Great achievements have been realized in the last two decades in this field but the technology is still under development.

To learn more, please visit <http://www.ijser.org/> we would like to thank all the contributing authors for providing such a rich variety of outstanding research articles on a broad range of exciting topics. We also would like to thank Graphic Designer and web administration for designing the outstanding coverage and web maintenance of this volume of the Journal.

If you have any questions or comments about the Journal, or would like to receive a printed copy of the most recent volume of the Journal, please contact the Editor board from <http://www.ijser.org/contact-us.aspx>. The Journal is available online, please visit the following website: <http://www.ijser.org/>.

Enjoy!
