Volume 1, Issue 11, November 2010

By IJSER Editorial Board

IJSER is proud to announce the publication of the first volume and issue 11 for the year 2010 of the International Journal of Science & Engineering Research. This Journal provides a glimpse into a few of the many high quality research activities conducted by the talented researchers around the world. The Journal is a compilation of outstanding papers from numerous disciplines submitted by students, researchers and scientists who have been involved in research, scholarly, and creative activities. The papers are through with an enhanced skill set, including better problem solutions, critical thinking, and team-working skills. Since many researchers who are highly qualified in their region, support of academic and research has a direct and positive impact on the upcoming researchers. We would like to express our sincere thanks to all those scientists for choosing IJSER from the first volume of the Journal since year 2010 and making it to almost the end of 2010 now. We would like to especially thank the editorial members of the IJSER team for their constant support over past year and also a welcome to the new members joining the team. Many thanks to the paper review committee for their constant support in timely reviewing the papers to the best of their expertise knowledge. The support from prominent regional businesses and organizations is greatly appreciated and essential for the advancement of research and journal wellbeing. There is a wide range of paper submission all the way from technology to social science titles like "*Promoting e-Governance through Right to Information: A Case-study of India*" by Shalini Singh explaining Reinventing government has been a dominant theme since 1990s, wherein governments world over are attempting to improve the systems of public service delivery. Rapid strides made in the field of Information and Communication Technology (ICT) have facilitated the reinvention of governments and prepared them to serve the needs of a diverse society. In other words, the information age has redefined the fundamentals and transformed the institutions and mechanisms of service delivery forever. The vision is articulation of a desire to transform the way the government functions and the way it relates to its constituents. The concept of electronic governance, popularly called e-governance is

derived from this concern. The research topics extended to the deep technical titles like "*Ideals in Group algebra of Heisenberg Group*" by M. L. Joshi explaining the details as In spectral theory ideals are very important. We derive the relation between non commutative and commutative algebra by a transformation which is associated to the semi-direct product of groups. We obtain and classify the ideal in L1 -algebra of Heisenberg group.

To learn more, please visit http://www.ijser.org. We would like to thank all the contributing authors for providing such a rich variety of outstanding research articles on a broad range of exciting topics. We also would like to thank Graphic Designer and web administration for designing the outstanding coverage and web maintenance of this volume of the Journal.

If you have any questions or comments about the Journal, or would like to receive a printed copy of the most recent volume of the Journal, please contact the Editor board from http://www.ijser.org/contact-us.aspx. The Journal is available online, please visit the following website: http://www.ijser.org/.

Enjoy!
