

Volume 4, Issue 12, December 2013

By IJSER Editorial Board

The Journal of Scientific & Engineering Research (IJSER) was started with an aim of bringing all the research works to open world in the form of open access journal, from the year 2010. The main concept of IJSER is to collaborate the various scientists, engineers and technical related personalities, specifically the users of various areas of Scientific, Industrial and Medical applications. A variety of distinguished authors, article types and both interesting and useful historical and technical subjects are included in these articles.

Among all the papers from the December 2013 edition two of them have caught the attention of many reviewers, *“Improving the Strength of Sandy Silt soils by Mixing with Cement Kiln Dust”* by Dr. Mohie ElMashad, and Dr. Ahmed Hashadand *“Spiritual Maturity and Leadership: A study on leaders of different age bars”* by Mr. Amit Kumar, Ms. Gunjan Anand, Mr. Arpan Shrivastava. IJSER’s publication house has the collection of numerous collections of papers presented by efficient students, research scholars and professors. Dr Mohie ElMashad paper on Egyptian irrigation and drainage system consists of the River Nile, its branches, canals and drains. It is very important to keep them working in good condition to assure efficient water management and distribution process.

2013 December edition has the collection of various papers from different departments with high quality and pertinent documents. It is the process beginning with the authors submitting their papers, time and materials required by reviewer to provide opinions based upon mathematical, analytical, scientific and technical aspects. The comments from a reviewer is given huge value and it will be helpful for editorial board, whether to publish the paper or not. These criticisms may help the authors in the near future to improve the depth of their papers in all aspects and maintain the quality according to IJSER.

International Journal of Scientific and Engineering Research
ISSN 2229-5518

IJSER will always welcome the authors to publish their work under IJSER Publication house likewise the above two research papers and it will be discussed if there are any such interesting outstanding topics. If you have any comments and questions, you will definitely find your answers on our websites
